Bitumen Compound
High Grade Bitumen Waterproof

Description

Bitumen Compound is a special formulated from high grade bitumen, forms durable and providing waterproof protection that designed for sealing joints, cracks and gaps in concrete bricks, walls, weathered galvanized sheet, asbestos sheets, stopping leaks through cracks of roofs of metal and roof tightening. It is also suitable for use on guttering, porous masonry, structured steel work.

Uses

- Providing waterproof protection that designed for sealing joint, crack and gapes in all phase
- Provide good lasting, maintain flexibility and water resistant for use on guttering, porous masonry, structured steel work

Advantages

- Excellent adhesion with strong durable bond
- Tough and durable with excellent flexibility
- Good resistance for weathering and chemical
- Easy to apply

Application Method

For sealing cracks in concrete and asbestos sheet, just simply fill the cracks with sealing Bitumen Compound using a knife or trowel. For stopping leak round the heads of nails no roof sheet, must apply a coat of Bitumen Compound round the nail heads with a stiff brush. Next, for repairing holes on roof sheet, apply a coating of Bitumen Compound round the hole and cover the hole with a piece of cloth, then paint over the cloth.

Protection/Curing

It takes within 12 hours to set and dry depending on environmental conditions.

Cleaning of Tools

Clean hands and tools with kerosene when wet and use kerosene or solvents when dry.

Packing & Size
